1. The plant is assigned to the "CS zavody kovodelne a strojirenski n.p." (Nationalized Czechoslovakian Metal-working and Engineering Industry) and is a subsidiary plant of the "Spojene tovary na obrabeci stroje n.p."
2. The plant was formerly the PLAUERT Machine Tool Plant in WARNSDORF (C 51/F 87).
3. Output: machine tools, mostly horizontal drilling machines and grinding machines.
4. Machinery: about 10 horizontal drilling machines, 6 large planers, 12 drilling machines, 35 grinding machines, 3 milling machines, a great number of shaping machines and lathes. Each machine is equipped with an electromotor for individual operation. The plant also has three presses used for pressing shells during the war.
5. Supply of materials: The castings for manufacturing machine tools are supplied partly from PRAGUE, partly by the plant-owned foundry, also located in WARNSDORF.

Comment: All large machine tool-producing plants are combined in the nationalized enterprise "Combined Machine Tool Plants." The former "Arno Plauert" Machine Tool Plant in WARNSDORF meanwhile assigned to this national enterprise, was already a noted though small-sized special plant before the war. Its special production is being continued.

1 Annex: WARNSDORF Machine Tool Plant.
